Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-12, 16, and 18, drawn to a fuel cell system and a method of operating the fuel cell system which is comprised of a fuel cell, an air supplier, a sucked air temperature detector, an atmospheric pressure detector, a control apparatus, a delivered air temperature detector, an outside air temperature detector, a sucked air temperature change predictor, and a humidifier.

Group II, claims 13-15, drawn to a fuel cell system comprised of a supply system, a fuel cell, and a controller with first, second, all of which is provided in a vehicle.

Group III, claim 17, drawn to a fuel cell system comprised of a supply system, a fuel cell, and a controller with first and second control means.

Group IV, claim 19, drawn to a control method for operating a fuel cell system.

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common subject matter between Groups I and II is a supply system, a fuel cell, and a control apparatus (controller), a restricting function, and something to mitigate the restricting function. The common subject matter does not make a contribution over the prior art (see JP 62-103979 A, JP 2002-117875 A, and/or JP 60-160573 A, all of which

are cited as "X" references on the international search report). Accordingly, Groups I, II, III, and IV lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
